Why iDbM Inc?

☑ Experience

The iDbM Inc. development team brings 75 years of experience in software engineering and management in both technical and business environments. As a result of our background the Simply WMS / ERP development team has a deep understanding of and insight into key business processes. We can deliver world class Business Intelligence tools that work with your legacy ERP systems and/or create customized WMS and or ERP solutions with built in BI Reporting which really fit to your core business. We understand first, then we adapt.

☑ ERP Adapted to Your Business Process

Your business should not have to adapt reliable processes to fit a generic software solution. If you are deciding to upgrade from your legacy ERP systems then choosing a customized WMS or ERP solution has many benefits. Simply WMS / ERP's goal is to streamline business process by adapting to fit the process not the other way around**.** If you have a unique manufacturing/business process we can capture it and integrate it into your customized Simply ERP or Simply WMS installation. When you need to create a new process or change existing ones Simply WMS + ERP can easily adapt.

☑ The Simply ERP Database Engine

Both Simply WMS and/or Simply ERP bring you full scalable, upward and forward compatible Warehouse Management & Inventory Control customizable solutions that are built on the stability of trusted Microsoft platforms. Both Simply WMS/ ERP are client /server models with front ends that come with many standard software modules available from our Simply ERP Database Engine. The Backend supports   fully functional time tested relational database designs   using robust SQL 2008 database which allow your company data to grow with your business.

☑ Simple to Use Graphical User Interface

Acknowledged as one of the friendliest and easy to use user interfaces in the industry, the Simply WMS + ERP team now uses this very simple to learn and use graphical interface as a standard on all our product line giving the customer a common set of intuitive keystrokes and icons to navigate both standard and custom add-on modules.

☑ ROI and Value

Simply WMS and /or Simply ERP are easy to own and easy to maintain. Since it is built to fit your process and affordable you will pay less for Simply WMS + ERP and find your team using nearly 100% of the features unlike more rigid, generic ERP packages. Higher effective use means better value to your business and better return on your investment. Simply WMS/ ERP solutions also offer robust and customized BI reporting to provide truly useful information for your management and control.

☑ Speed and Support

A Simply WMS + ERP implementation can be accomplished in a relatively short time (weeks as opposed to months). The iDbM support philosophy is to train and support the customer on their production database when the customer is ready to do so. Our experience has proven that this is the most efficient and fast method to speed up the learning process. The added benefit is iDbM support team is also your business consultant giving you valuable insights on how to get even more efficiencies from your existing processes. Our support and "can do" attitude has earned iDbM Inc. a high client retention rate.
